

Dear Fellow Community Service Health providers,

Introducing Professional Development for Healthcare Workers

We would like to take this opportunity to introduce you to Reiki Australia, as well as to an online professional development course that may appeal to some of your members and/or indeed friends who work in the holistic healthcare field.

We are a national leading voice committed to raising the profile of Reiki as a spiritual practice and healing art. We are actively working to raise the benchmark of Reiki treatment practice nationwide.

In addition to being a service provider to our Members, who include students, practitioners, Masters and teaching Masters, we also offer professional development courses that are now available online.

The '***Professional Development for Healthcare Workers***' course is a non-accredited certificate course of benefit to unregistered healthcare workers (*any person who provides a health service and is not registered in one of the health professions regulated under the National Law*).

This training was developed to ensure client safety and to give practitioners an opportunity to gain knowledge, skills and a deeper understanding of their professional responsibilities as described in the **National Code of Conduct for Healthcare Workers** (referred to as the National Code).

To find out more about this professional development opportunity, please visit
<https://reikiaustralia.wildapricot.org/Healthcare-Workers/>

To purchase the full course or single units go to the Reiki Australia website shop
<https://www.reikiaustralia.com.au/product-category/online-shop/>

Thank you, we're looking forward to hearing from you.

Amy Squires
Operations Manager
Reiki Australia
